

Events if they worsen in West Asia will have major repercussions as regards India's energy needs, and thus India must not remain an indifferent bystander but be far more proactive than hithertofore. Let our government host a summit for leaders of Israel, Iran, the US, Russia, and itself in New Delhi and thrash out a common minimum programme ...

Responding to a question on the possibility of India becoming a mediator between Russia and Ukraine, he said, "India is an important country. If India sees to play that role which provides resolution of the problem...If India is with its position of a just and rational approach to international problems, it can support such process."

SOLAR ENERGY CORPORATION OF INDIA (SECI) Solar Energy Corporation of India Limited (SECI) is a Schedule-A CPSE under the Ministry of New and Renewable Energy (MNRE) for implementation of schemes and development of Renewable Energy projects (Solar, Wind, Hybrid, Round the Clock RE, H2 etc.) etc. in India and abroad.

Focused on the development of lightweight, high efficiency, hydrogen fuel cell systems. We're one of the world's leading hydrogen fuel cell manufacturers, delivering a range of zero-emission hydrogen fuel cell products - from 800W to over 300kW - to automotive, aerospace, power generation, telecoms, marine, rail, UAV and materials handling industries.

Fast renewable growth drives exponential demand growth for energy storage in India. The country intends to build 47 gigawatts (GW)/236 GW hours (GWh) of battery storage capacity by 2031-32. This ambitious scale-up is equivalent to installing nearly 80 of the largest battery storage facilities globally and 110 times larger than the capacity of ...

The "Indian century" argument is usually built on two pillars: demography and economics. India's growing population has already surpassed China's, and by 2050, 20 percent of the world's workforce could be Indian. Once projected to be the "world's second-largest economy," India is now poised to become the "world's largest everything."

The "Indian century" argument is usually built on two pillars: demography and economics. India's growing population has already surpassed China's, and by 2050, 20 percent of the world's workforce could be Indian.
