

How much energy does Moldova use?

Moldova imports 100% of its gas and coal consumption, nearly all of its oil consumption and around 80% of its electricity (including electricity procured from the Moldavskaya GRES [power station] situated in Transnistria). 1 Second, Moldova has obligations stemming from its aspirations for European integration.

What are the sources of electricity and gas imports in Moldova?

The sources of electricity and gas imports are not diversified and crucially depend on gas supply from Russia and electricity supply from the Moldavskaya GRES power station, which operates beyond the control of the Moldovan government.

Is Gazprom provoking an energy crisis in Moldova?

President Maia Sandu on Thursday accused Gazprom of provoking an energy crisis in Moldova, saying the Russian energy giant was refusing to supply gas through an alternative route if the fuel stops flowing through Ukraine at the end of this year.

Does Moldova have a security of supply?

Moldova has adopted the full set of security of supply rules, even beyond the current Energy Community acquis. The Moldovan government is also to be praised for the efforts focused on market reforms and aligning the national legal framework for energy with that of the EU.

How does Moldova get natural gas?

However, Moldova still procures natural gas almost exclusively from Gazprom through the traditional route from Ukraine: the Iasi-Ungheni-Chisinau pipeline remains mostly idle, and the Trans-Balkan reverse flow has not yet resulted in any significant flow to Moldova.

What challenges does the Moldovan energy sector face?

Despite all of these notable achievements, the Moldovan energy sector still faces major challenges which need to be addressed in a timely manner in order to improve energy security, accelerate the transition towards a more sustainable, clean and efficient energy system and support the development of free and competitive energy markets.
