

Schools must look further than the current "gifted" population and closer than do the current instruments in the identification process. This is precisely what our new identification battery of gifted and talented students, the Aurora Battery, is intended to make possible. Developed from Sternberg's theory of successful intelligence, this group-administered assessment battery is ...

Shenzhen Aurora battery, founded in 2010 at China's Silicon Valley, a national high-tech enterprise focused on R & D, manufacture and sales of solar battery packs and solar home system. As innovation is our core competence, we keep developing all type of cutting-edge product, leading ahead of the industry in off grid energy storage battery.

Note: In order to run self-consumption calculations in Design Mode, you will need to click on Simulate upon making any changes. Aurora calculations assume a 2% degradation in battery capacity per year. Selecting a Battery. Select the desired battery model from the dropdown and enter the quantity. Aurora will then calculate the:
