Annual wind power contribution in the Falkland Islands is set to rise to 40 per cent of total energy generated with the installation of three new wind turbines, which started going online on 15 February. The installation of the first three wind turbines in 2007 has resulted in the displacement of 26% of annual fuel... Read more »

Falkland Islands: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

When the respective New Zealand Defence Force (NZDF) and Australian Defence Force (ADF) were presented with similar complex operational situations, it took the combined effort of Myriad Technologies expert consultants and partner iOra's unique software to provide powerful, satisfactory solutions.

The Falkland Islands' Energy Strategy sets out the Falkland Islands' energy priorities to ensure the Falkland Islands are more energy-independent, secure, and resilient. The world is moving rapidly towards renewable energy, meaning that it is important for the Falklands to chart our own course in the transition.
