

What are the main energy sources in Namibia?

Namibia's top energy sources are petroleum, hydropower, imported electricity, and imported coal. The country's own internal resources supply less than one-third of its needed energy requirements. Namibia has high potential for solar, wind and biomass generation.

Why is energy important in Namibia?

Energy is an essential ingredient of modern life, and a critical pre-requisite for Namibia's socio-economic development. Government recognises that the country's energy sector is of strategic importance, and wishes to enable it to yield maximum development benefits. Namibia is abundantly endowed with diverse indigenous energy sources.

Where does Namibia's electricity come from?

28% of Namibia's generated electricity come from fossil fuels, while 64% are from hydropower, and about 8% come from renewables. Non-electricity off-grid renewable energy projects include the small/micro wind energy installations used for water pumping, which are very common in Namibia, especially on farms.

What is Namibia's energy policy?

This has prompted Government to initiate the update of Namibia's first energy policy to create a future-oriented energy policy for the country. The National Energy Policy of 2017 is an expression of Government's intent and our specific desire to see the energy sector develop, in alignment with Vision 2030, for the benefit of all Namibians.

Does Namibia have a thermal energy sector?

Namibia's thermal energy sector is in its infancy. This sector has few direct regulatory provisions, and past policies have only paid peripheral attention to this fledgling sector. In part, this is the result of the close historical link to, and dependence on, the electricity sector.

What is happening in Namibia's energy sector?

Namibia's energy sector has seen rapid development in a short period of time owing to five recent major oil and gas discoveries, which include the Venus-1X, Graff-1X, Jonker-1X, La Rona-1X, and Lesedi-1X exploration projects.

Free and open company data on Slovenia company ETMT ENERGY, PRODAJA IN DISTRIBUCIJA ELEKTRICNE ENERGIJE, D.O.O. (company number 8787719000), DUNAJSKA CESTA 136, 1000 LJUBLJANA

Namibia's main energy sources include biomass, sun (solar), thermal, hydropower wind and coal. With the discovery of oil, we can add petroleum and green ...
