

Is Nepal a good place to invest in green energy?

Nepal - the landlocked Himalayan country, sandwiched between Asia's two most populous nations, India and China - has the potential to hold a key position on the subcontinent when it comes to green energy. Its rivers that sprout from the highest mountains in the world, offer a vast potential for hydropower in the region of 40,000 megawatt.

Can Nepal provide green energy to South Asia?

Nepal could play a crucial role in providing green energy to South Asia by reducing the output of black carbon that accelerates climate change and pollutes the majestic Himalayas. But how can we ensure Nepal's energy production is in harmony with nature and local communities? FMO's 'Environmental and Social' sector initiative is a good start.

Does Nepal import electricity from India?

Despite its abundant renewable energy potential, Nepal still currently imports 500 MW of (coal-fired) electricity from India throughout the year. FMO co-financed two hydropower projects in Nepal. Lower Solu in 2014 and Upper Trishuli in 2019.

Could Nepal be a solar power hub?

The Himalayan region is also known for high solar radiation, providing a huge capacity for potential solar power development. "Nepal could potentially provide North India, Bangladesh and parts of China with green energy," Silvanus says. And at the same time, address chronic poverty levels in Nepal, one of the world's least developed countries.

What is the potential for solar power in the Himalayas?

Its rivers that sprout from the highest mountains in the world, offer a vast potential for hydropower in the region of 40,000 megawatt. The Himalayan region is also known for high solar radiation, providing a huge capacity for potential solar power development.
