

The fibre and ash composition of the raw lignocellulosic feedstocks was determined with an acid hydrolysis method developed by the USA's National Renewable Energy Laboratory (NREL) (Sluiter et...

PDF | On Jan 1, 2008, A. Sluiter and others published Determination of Extractives in Biomass, NREL TP-510-42619 | Find, read and cite all the research you need on ResearchGate

The total composition analysis of biomass was also conducted using the standard NREL method (NREL/TP-510-42618) for comparison. The total composition analysis of the biomass indicates the dominance of cellulose (Fig. 3 c) and confirms the earlier observations that cellulose dominates hemicelluloses by nearly twofold, and that the lignin content ...

The aliquots of lignin and delignified solids were chemically analyzed according to the following National Renewable Energy Laboratory (NREL) methods: moisture (NREL/TP-510-42621) [32] and structural carbohydrates and lignin (NREL/TP-510-42618) [33]. Sugars (glucose, xylose, arabinose), acetic acid, hydroxymethylfurfural ...

Este documento presenta un procedimiento analítico de laboratorio para determinar los carbohidratos estructurales y la lignina en biomasa a través de una hidrólisis en dos pasos. Los carbohidratos se hidrolizan en formas ...

Este documento presenta un procedimiento analítico de laboratorio para determinar los carbohidratos estructurales y la lignina en biomasa a través de una hidrólisis en dos pasos. Los carbohidratos se hidrolizan en formas monoméricas que se miden por HPLC, mientras que la lignina se fracciona en material insoluble y soluble en agua. El procedimiento es adecuado ...
