

How much do garden solar panels cost?

Garden solar panels function like traditional solar panels but are ground-mounted instead of roof-mounted and placed in your garden. They are typically more expensive than regular solar panels, costing approximately £11,700 for a 4kW system, but can help you save £660 annually on electricity costs.

How much do solar-powered garden lights cost?

Solar-powered garden lights usually cost between £30 and £200. Large roof-mounted solar panels cost a lot of money, and not everyone has the finances or roof-space for them. Luckily, there are lots of different ways to use solar panels in your garden, and most aren't that expensive.

How much do ground-mounted solar panels cost?

Ground-mounted solar panels are the most expensive option. A 10 panel system large enough to power an average three-bedroom house will cost around £7,026 to buy and install. Take a look at the table below to see how much ground-mounted solar panels cost depending on the size of the property.

How much does a solar generator cost?

While solar generators are very affordable to run, they can be expensive to purchase initially. You should be able to find small solar generators for as little as £200, while large state-of-the-art generators with huge capacities may cost over £5,000. Those designed for camping trips and caravan holidays will be at the cheaper end.

What costs should you consider before installing solar panels?

There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

Which solar panels should you choose for your garden?

However, if space is limited, you can opt for smaller panels, such as portable solar panels, or even mini solar panels that power garden lights, all of which you can set up yourself. Solar panel pergolas are also something those with a modest amount of space should consider.
