

PORTLAND, Ore. -- Pacific Power recently awarded more than \$2 million to 18 cities, small towns, community colleges and nonprofits throughout the state for projects that will connect more Oregonians to the cost-saving, clean-air benefits of electric vehicles and electric mobility -- including residents of underserved and rural communities that Pacific Power serves.

Pacific Power Oregon non-residential customers with an active commercial vehicle fleet are eligible. Applicants must be property or site owners or have authorization to sign applicable program agreements. All Level 2 and DCFC ...

As more drivers make the switch to EVs, it's important to understand when to charge your vehicle to have less impact on the environment and the energy grid. Energy prices are typically highest during the late afternoon and evening, which can result in increased electricity prices for everyone since electrical infrastructure must be built to provide power when energy use is highest.

Pacific Power's Electric Vehicle Infrastructure Rule 24 will pay for and coordinate the design and deployment of service extensions from our electrical distribution line facilities to the service delivery point for separately metered electric vehicle charging stations.

Businesses can also pay via Electronic Funds Transfer. With this option, you authorize your bank to send the payment in an ACH file to Pacific Power's bank for deposit. You can receive your invoice via EDI, online or through the U.S. mail. Your payment is posted to your electric account within 24-72 hours.
