

Are independent power producers a problem in Pakistan?

Pakistan's power sector has been plagued by challenges for decades, with unreliable service delivery at high costs that burden consumers and the economy. At the centre of much debate and criticism are Independent Power Producers (IPPs) the country started inducting in the early 1990s to boost electricity generation capacity.

Are IPPs responsible for electricity generation costs in Pakistan?

In Pakistan, with a high reliance on imported fuels and currency devaluation, electricity generation costs account for nearly 90 per cent of total power sector revenue. Therefore, as electricity prices climb, IPPs are blamed for having a major share in generation capacity.

Who owns 80 percent of power plants in Pakistan?

He said that 52 percent of power plants are owned by the government and 28 per cent are owned by Pakistan's private sector, 40 families/groups, so 80 percent are owned by Pakistanis. Electricity being sold to us at Rs60 per unit is only because of these corrupt contracts, mismanagement and incompetence, he claimed.
