Or Get A Quote! PNG Solar Supplies provides custom solar power solutions in Lae, Morobe Province, Papua New Guinea. Empower your home with solar energy.

Can Australia finance a solar plant in Papua New Guinea?

In 2020, Australia approved financing for a large scale Solar Plant in Papua New Guinea to be developed in partnership with PNG Power Ltd. The location for the proposed site remains in negotiation.

How much electricity does Papua New Guinea have?

An estimated 12% of Papua New Guinea's population has access to on-grid electricity. The country's power supply network is extensively unreliable, and blackouts are the order of the day. It relies heavily on oil and diesel, even though it has a huge potential for hydro and solar power generation.

Is solar the cheapest form of energy in Papua New Guinea?

The cost of solar equipment worldwide continues to get cheaper every year and even without any government policy to encourage it, solar is already one of the cheapest forms of energy in Papua New Guinea. Many local companies already understand this and are making plans to transition but we need to grow the industry to meet demand.

Is solar energy the future of Papua New Guinea?

To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030. There is no doubt that solar energy will play a critical role in the attainment of this goal.

Is Papua New Guinea the world's largest off-grid solar market?

Although on-grid solar lighting is a cause for concern, the country has emerged as one of the world's largest off-grid solar markets. To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030.

To be precise, 60% of households in Papua New Guinea rely on off-grid solar for daily lighting needs. The government of Papua New Guinea targets to electrify 70% of the country by 2030.
