

What is a fixed adjustable photovoltaic support structure?

In order to respond to the national goal of "carbon neutralization" and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed adjustable photovoltaic support structure design is designed.

Does a static PV envelope reduce energy demand?

Making the static PV envelope adaptive reduces the annual net energy demand by an additional 6 to 19 percentage points. We observe the most substantial energy benefits in temperate and arid climates for both building use types.

Can a dynamic photovoltaic envelope improve solar tracking in real weather conditions?

We describe two envelope prototypes and demonstrate autonomous solar tracking in real weather conditions. The dynamic photovoltaic envelope achieves an increase of up to 50% in electricity gains as compared to a static photovoltaic envelope.

Does PV installation design influence induced currents from nearby lightning strikes?

Coetzer, K. M. Wiid, P. G. and Rix, A. J. "PV installation design influencing the risk of induced currents from nearby lightning strikes," Proceedings of International Conference on Clean Electrical Power (ICCEP), Otranto, Italy, 204-213 (2019).

Does a dynamic photovoltaic envelope increase energy gains?

The dynamic photovoltaic envelope achieves an increase of up to 50% in electricity gains as compared to a static photovoltaic envelope. We assess energy savings potentials for three locations, six construction periods and two building use types.

Where is a dynamic photovoltaic building envelope mounted?

The envelope is mounted at the NEST building at the Swiss Federal Laboratories for Materials Science and Technology, in Dübendorf, Switzerland. Svetozarevic, B., Begle, M., Jayathissa, P. et al. Dynamic photovoltaic building envelopes for adaptive energy and comfort management.

GS-style photovoltaic brackets, which feature a design similar to satellite receiving antennas' "dish" supports, include a north-south horizontal axis and an east-west inclined axis. This innovative structure enables adjustments to be ...

The utility model discloses a kind of collapsible photovoltaic brackets, including the affixed supporting rod of one and ground, the supporting rod front end is removable to be connected ...

structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc. It is one of ...
