

Do I need a prior approval for a solar panel installation?

Application to determine if prior approval is required for a proposed: These provide more scope for solar panel installations on buildings (or in the curtilage of a building) and in non-domestic off-street parking areas without needing full or householder planning permission. When will you need to make a prior approval application?

How do I get a DNO letter for solar panels?

To acquire a DNO (Deed of Non-Objection) letter for installing solar panels, start by researching local regulations and utility company requirements. Then, submit a formal application detailing your proposed solar panel installation plans, including system specifications and any relevant technical information.

Why did we update our common project sections about solar panels?

Our common project sections about solar panels was updated in line with the amended permitted development rights so that users can gain an understanding of the criteria that needs to be met to be eligible for permitted development (or where a planning application would be needed). Loading...

Do I need a DNO application if I have solar panels?

If you have installed solar panels on your home and they are generating electricity, you need to let your regional DNO know. The size of your solar installation (above or below 3.68kWp) determines whether you need to make a DNO application before any work is carried out. This is because the DNO has to monitor fluctuations in the electricity grid.

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Do solar panels need planning permission?

Your installer should be MCS certified and a member of a CPS for microgeneration technology, such as NICEIC. After commissioning of the system, you will receive certificates to prove it meets the required regulations. In most cases, solar panels do not require planning permission as they fall under permitted developments.
