

Should you buy a home with solar panels?

There are many benefits to buying a home with solar panels yet, it is not always complication free. Therefore, it is important to understand the ins and outs before making an offer. Take a look at our guide to find out what you need to know before buying a property with solar panels. What are the benefits of owning a property with solar panels?

Can solar panels be bought outright?

Solar panels can be bought outright, but they are expensive. So many homeowners choose instead to lease out their roof space to solar panel companies. The company will then install the solar panels on the roof, but the panels themselves will remain the property of the company.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Are residential solar panels worth it?

If you compare this to the average annual electricity consumption of a household, which is around 2,700kWh according to Ofgem, residential solar panels can cover 117% of your electricity demand in perfect conditions. Other factors that affect whether solar panels are worth it include the following: Performance all year round.

What happens if a solar PV company goes out of business?

Sometimes solar PV companies sell on installations, or the ownership changes if a company goes out of business. If you're unsure who owns the solar panels on your home, you can contact energy regulator Ofgem's Feed-In Tariff Register Team at fitregister@ofgem.gov.uk.
