

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km<sup>2</sup> and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Does Pitcairn Island have electricity?

Pitcairn residents supply all electricity through the generator shown here. The generator stays on for only a few hours a day and turns off at 10 p.m. sharply. Is there Freshwater on Pitcairn Island? The Pitcairn Islands have very few freshwater habitats.

How much does it cost to go to Pitcairn Island?

Costs include expensive 4-hour flights to and from Mangareva from Pape'ete, hotel and transportation on each; plus a room and boarding house in Pitcairn is about \$4,500 for a week-long trip (3 days on the island) and a shocking \$5,000 for 2 weeks. Is there electricity on Pitcairn Island?
