

Whether you're home or not, your Generac home standby system kicks into action, and continues to power your home until utility power returns. Standby Generator FAQs Learn more about getting backup power to your home with a home standby solution.

There are two wattage ratings manufacturers provide--peak and running. Peak wattage measures the initial surge of power when the generator is first turned on. Running wattage measures the generator's power level the rest of the time. Running wattage is a better indicator of power. Most portable gas generators produce 4,000-10,000 watts.

Typically, home generators cost anywhere from around \$500 for small models that can power a few appliances to over \$1,500 for larger devices that can re-power your entire home. To help you select the best home generator for your needs, the This Old House Reviews Team put together this guide of the top home generators on the market.

Nick keeps his generator near his home power box, which is located on a windowless side of his home so the exhaust won't drift indoors. It stands about 5 feet from the wall, with plenty of space ...
