

Price list of photovoltaic panel concrete base

Can a reinforced concrete block support a solar panel above ground?

In areas where penetration of the ground is difficult or restricted for archaeological or safety reasons,our reinforced concrete blocks are the perfect solution,providing ballast to support these solar panels above ground. Our solar panel ballast blocks are designed to provide support to multiple panels.

Can a concrete base support solar panels?

An example of free-standing concrete bases being used to support solar panelscan be seen at Wellingborough solar farm. Due to an archaeological restriction on part of the land,our bespoke division manufactured 275 reinforced concrete blocks,this allowed a group of panels to be erected without the need for excavation.

Should I use precast concrete ballast blocks for my solar panel project?

Choosing to use our precast concrete ballast blocks for your solar panel project can provide you with added flexibility. Ballast blocks can be used on flat commercial-style roofs,where it is not possible to penetrate the roof surface,and are simpler to install than penetrating systems.

What types of solar ballast footings does Conigliaro block manufacture?

Conigliaro Block manufactures all types of precast concretesolar ballast footings used to securely mount and position solar panels. Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our footings are available in a wide range of sizes,weights and mixes.

What are solar panel ballast blocks?

Our solar panel ballast blocks are designed to provide support to multiple panels. Available in all standard sizes,the blocks can also be built to your exact requirements. Designed with cast-in lifting points for ease of handling,these blocks can be relocated if required and should outlive the lifespan of the panels themselves.

Are bifacial solar panels better than ground-mounted solar panels?

Ground-mounted solar panels are more efficient than roof-mounted solar panels,as achieving the best angle and direction is easier when no roof is in the way. This setup also enables the installation of bifacial solar panels,which can turn more sunlight into power.

Our ready-to-install PV solar panel bundle kits offer great value and contain everything you need, including solar panels, inverter and mounting brackets. We also can help with bespoke kit designs, our highly trained renewable energy ...

Our solar ballast blocks are poured to your specifications to prevent movement and overturning of solar panel systems. Our footings are available in a wide range of sizes, weights and mixes. We will cast-in the mounting structures and ...
