

Reasons why solar outdoor lights do not store electricity

Why is my solar light not working?

One of the most common reasons why your solar light isn't working is the wire between the solar panel and the battery. This wire is responsible for transferring the generated electricity from the solar panel to the solar battery -- charging it in the process. If this wire is broken, then your batteries won't charge no matter what you do.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.

How do you fix a solar light not working?

To fix solar lights not working, check and remove the battery pull tab, replace or deep charge the batteries, repair any damaged wiring, clean the solar panels, and ensure they're positioned in direct sunlight. How Do You Reset a Solar Light?

What if solar panel is not getting sun light?

If solar panel not getting the required sun light then the LED won't work or can't produce the brightest light as you would have expected. Make sure you place your light at a location where it gets direct sun light.

Why is my solar light not charging?

This happens because glass filters out certain wavelengths of sunlight that are crucial for charging the solar panels effectively. So, avoid placing your solar lights behind glass, such as windows, when charging, and always leave your solar light outdoors. 9. Reset The Solar Light
