

Requirements for installing photovoltaic panel scaffolding

Do you need scaffolding for a solar panel installation?

Solar panel installation is not short duration work and will need scaffolding or similar equipment. It should have a boarded working platform and full edge protection (double guard-rails and toe-boards) to stop people and tools from falling. Debris netting may also be necessary to prevent materials from falling on householders or neighbours.

What are the requirements for solar panel installation?

Enforce enforcement action by HSE inspectors. Solar panel installation is not short duration work and will need scaffolding or similar equipment. It should have a boarded working platform and full edge protection (double guard-rails and toe-boards) to stop people and tools from falling. Debris netting may also be necessary to prevent materials

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.

How long does it take to install a solar PV system?

Installing solar PV systems is fairly disruption-free and most systems are installed in two or three days. Unless your building is single storey, you'll need to have scaffolding put up.

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.
