

St Lucia has a high solar potential and set a renewable energy mix target of 35% by 2020. Presently St Lucia energy mix is comprised of just 1% renewable energy on the public grid. Its electrical demand peaks at 61MW and its electricity prices are high relative to ...

In my opinion, solar power in Saint Lucia remains in the hands of those who can make a large investment in the long term. For those who at some points cannot even afford the cost of electricity services, investing a large sum into solar panels is not a possibility, even though in the long term it will be consistently cheaper than traditional ...
