

How does Saudi Arabia generate electricity?

According to Nicolas Daher, the EIU's lead energy analyst, Saudi Arabia "currently generates almost all of its electricity from fossil fuels, of which 60% comes from natural gas and about 40% from oil". By 2030, it aims to achieve a true energy mix for electricity production, with renewable energy contributing around 50%.

What is Saudi Arabia's energy strategy?

The kingdom aims to increase its electricity generation capacity from 83 gigawatts (GW) in 2023 to 110 GW by 2028, supported by a \$293 billion investment in both conventional power and renewable energy projects. At the heart of this strategy is Saudi Arabia's goal to generate 50% of its electricity from renewable sources by 2030.

What type of energy does Saudi Arabia produce?

Energy in Saudi Arabia involves petroleum and natural gas production, consumption, and exports, and electricity production. Saudi Arabia is the world's leading oil producer and exporter. Saudi Arabia's economy is petroleum-based; oil accounts for 90% of the country's exports and nearly 75% of government revenue.

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Why is Saudi Arabia investing in solar energy?

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable growth by reducing oil dependency and investing in renewable energy.

Why is Saudi Arabia transitioning to independent power and water projects?

Saudi Arabia is transitioning towards independent power and water projects to address the escalating power requirements and broaden the array of energy sources via the National Renewable Energy Program. This will be accompanied by a substantial rise in non-oil government income and the private sector's contribution to GDP. 1.
