

How important are renewables in the energy mix of Seychelles?

What is the role of renewables in electricity generation in Seychelles? What are the main sources of renewable heat in Seychelles? Renewables are an increasingly important source of energy as countries seek to reduce their CO2 emissions and dependence on imported fossil fuels.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

What is a 100% renewable Seychelles?

A 100% renewable Seychelles - A plan to change the Seychelles' power supply to 100% renewables, its costs and possible benefits. Centre for Sustainable Energy Systems (CSES/ZNES), System Integration Department. Report 1: Mahé, and Report 2: Praslin and La Digue. International Monetary Fund (IMF). (2017a).

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

How much does Seychelles contribute to global emissions?

With approximately 0.003% of the world's GHG emissions in 2011, Seychelles contributes only marginally to the global emissions on an absolute scale (GoS, 2015). However, in particular the energy sector is carbon intensive. About 90% of all domestic CO2 emissions stem from power generation and the road transportation sector.
