Joju Solar | 4,682 followers on LinkedIn. Just Add Sunshine ... | Joju Solar are the UK's leading installers of solar PV, battery storage and EV charging infrastructure. Founded in 2006, by entrepreneur Joe Michaels and Oxford University renewables lecturer Chris Jardine, Joju Solar has grown from a 2-man band into the UK's most trusted installers of green technology.

Joju Solar has installed a 1.8kW solar photovoltaics system for Wentworth Primary School in Hackney. The system, which has been fitted to a shelter where the children play, will save the school money on electricity bills as well as providing them with feed-in tariff payments for the next 25 years. "We really love working with local schools.

Joju Solar was founded in 2006 by Joe Michaels and Dr Chris Jardine. Today, we are one of the UK's leading companies for installing solar PV, battery storage and electric car chargers.

Image: Joju Solar. Why is it so easy to complicate the rules for solar panel projects, just when we so urgently need to encourage them? At the same time it seems almost impossible to require renewables on new buildings ...

"[Solar panels] should project no more than 200mm from the roof slope or wall surface." Again, for sloping roofs it is standard practice to install panels under 200mm from the slope of the roof. Solar mounting frames used to attach solar panels to pitched roofs are low profile and the panels won't project more than 200mm from the roof slope.
