

What is Sinopec doing in green hydrogen refining?

In the field of green hydrogen refining, Sinopec has been vigorously advancing centralized wind power and photovoltaic development, laying out mega-scale projects integrating renewable energy power generation, hydrogen production, storage, and utilization.

How much hydrogen does Sinopec produce a year?

As the largest hydrogen producer in China, Sinopec is currently producing approximately 3.9 million tons of hydrogen per year and in terms of green hydrogen technology, Sinopec has applied its first self-developed PEM water electrolysis hydrogen production station.

How many hydrogen refueling stations does Sinopec have?

With a focus on hydrogen transportation and green hydrogen refining, Sinopec is accelerating its hydrogen development with the establishment of more than 100 hydrogen refueling stations, owning and operating the largest number of hydrogen refueling stations in the world to date.

What is Sinopec Xinjiang Kuqa green hydrogen pilot project?

KUQA, China, Aug. 31, 2023 - China Petroleum & Chemical Corporation (HKG: 0386, "Sinopec") completed the construction of the Sinopec Xinjiang Kuqa Green Hydrogen Pilot Project (the "Project"), China's largest photovoltaic green hydrogen production project lately.

What is Sinopec's first green hydrogen plant?

Sinopec's first green hydrogen facility has the capacity to produce 20,000 metric tons of hydrogen a year, using solar power to electrolyse water, the company said in a statement. The plant, in Kuqa city in Xinjiang, is China's first solar green hydrogen facility with an annual capacity of more than 10,000 metric tons, the company said.

Does Sinopec have a green hydrogen plant in Xinjiang?

Our Standards: The Thomson Reuters Trust Principles. China's Sinopec has begun producing green hydrogen at a plant in the western region of Xinjiang, the company said on Friday.

Arctic Green and its JVs form the world's largest and fastest growing geothermal heating & cooling consortium, decarbonizing cities across the world. We Develop, Invest in, and Operate profitable geothermal and green energy projects. ...

Sinopec, China's state-owned petroleum and chemical company, has successfully completed its first 10,000-ton green hydrogen demonstration project. The project, ...

"The Sinopec Group's renewable hydrogen production, combined with our expertise in solar energy, is one step further towards meeting China's commitment to net zero ...

China Petroleum & Chemical Corporation completed the construction of the Sinopec Xinjiang Kuqa Green Hydrogen Pilot Project, a release from the company said. ...

Sinopec, one of the world's largest oil and petrochemical enterprises and China's largest hydrogen producer, announced the commission of what it claims to be the world's ...

In the field of green hydrogen refining, Sinopec has been vigorously advancing centralized wind power and photovoltaic development, laying out mega-scale projects integrating renewable energy...

As part of the project, Sinopec will build a new photovoltaic power station with an installed capacity of 300MW and annual power generation of 618 million kilowatt-hours, an ...

The 6.3-square-kilometre Xinjiang Kuqa Green Hydrogen Pilot Project produces 20,000 tonnes per year of green hydrogen and is powered by a 300-MW photovoltaic plant. It also contains a hydrogen storage tank farm with ...

Sinopec's first green hydrogen facility has the capacity to produce 20,000 metric tons of hydrogen a year, using solar power to electrolyse water, the company said in a statement.

Sinopec helps Inner Mongolia explore a new model to improve the comprehensive utilization efficiency of regional energy; The project consists of five parts: wind ...

Bai Jitian, an analyst at Chuancai Securities, believes in his research report that, on the one hand, the investment will help to expand Sinopec's high-end chemical materials ...

China Petroleum & Chemical (Sinopec) has broken ground on a CNY3bn (\$470.77m) photovoltaic (PV) green hydrogen production project in Kuqa, Xinjiang, China. ...

Sinopec, China's leading hydrogen producer, has commissioned the world's largest solar-to-hydrogen project in Xinjiang--a \$417 million initiative that combines a 300-MW solar power plant with a hydrogen electrolysis setup.

As part of the project, Sinopec will build a new photovoltaic power station with an installed capacity of 300MW and annual power generation of 618 million kilowatt-hours, an electrolyzed ...

The 3 billion yuan (\$417 million) project features a 300-megawatt photovoltaic plant, a 20,000 tpa hydrogen electrolysis plant and a hydrogen storage tank farm with capacity ...

In collaboration with CATL(Guizhou), SUNNIC successfully completed the "Sinopec Guizhou PV-Energy Storage-EV Charging Microgrid" project. Despite the challenging ...
