

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

How can Slovak Republic improve its energy policy?

Ensure a stable and predictable legislative framework with an independent and adequately resourced regulator, and encourage investments in energy projects in accordance with the long-term national energy strategy. Slovak Republic's recent energy policies have made significant progress.

How much electricity does Slovak Republic produce a year?

Its annual production (2,200 GWh) is almost half of the total electricity production of hydroelectric power plants in the Slovak Republic. There are currently five wind turbines in operation in the Slovak Republic with a total installed capacity of 3.1 MW and annual production of approximately 5.5 GWh of electricity.

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the construction of wind power plants has almost completely halted, with two small wind parks existing in Cerov and Myjava.
