

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the construction of wind power plants has almost completely halted, with two small wind parks existing in Cerov and Myjava.

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

How much electricity does Slovakia generate a year?

Last year, Slovakia generated 24.68 terawatt hours (TWh) of electricity. This represents a decrease of more than 3 TWh compared to the previous year and more than 5 TWh compared to 2020. The generated electricity saw an increase of more than 7% in nuclear generation, while gas-fired plants fell from 15.40% to 8.56% of all electricity generated.

How much money will the Slovak energy sector bring?

The Slovak energy sector is expected to receive approximately EUR 140 million from the Renewal and Resilience Plan. The Ministry of the Economy of the Slovak Republic intends to publish five calls that should bring nearly EUR 140 million to the sector, with two of these calls expected to be published this summer.

Uma dúvida recorrente no mercado fotovoltaico é se os projetos de energia solar zero grid precisam ser homologados. Para responder esta pergunta, o Canal Solar conversou com Pedro Dante, sócio da área de energia e infraestrutura do Lefosse Advogados.. De acordo com ele, por se tratar de um tema novo, não existe um padrão sobre a necessidade ou não de ...

O inversor grid tie é um dos equipamentos mais importantes para quem quer contar com o sistema de energia solar fotovoltaica na sua residência ou empresa. Por isso, é fundamental entender como funciona o equipamento, qual sua participação no processo de geração de energia e

sua durabilidade. Mas, antes de falarmos sobre o inversor grid tie, vale [...]

Kit Solar Off Grid. Los sistemas solares off grid están orientados para quienes deseen obtener electricidad en zonas sin acceso a red o para quienes deseen abastecer su consumo eléctrico en al menos un 70% de energía proveniente de sus paneles solares. En sistemas con inversor cargador, el 30% restante se podrá abastecer desde la red o un ...
