What are the best solar energy activities for kids?

There are many solar energy activities for kids,so we've split it out into age group. Elementary School Go on an electricity scavenger huntin your home to find all the places and items that use electricity. Play Power Up!,a game from NASA's Climate Kids program where the goal is to maximize your renewable energy sources to power homes.

How do you explain solar energy to kids?

When explaining complex topics to kids,it's best to stick to the basics and use words they'll understand. Here's our kid-friendly explanation of solar energy: Solar panels are a lot like plants.

What are some facts about solar energy?

Find out the answers to these questions and more with our range of solar power facts and general information. Solar energy is obtained from sunlight. Solar energy has been used by humans for a long time for uses such as heating,cooking food,removing salt from seawater and drying clothes. These days it is also used to create electricity.

What is solar energy used for?

Solar energy is light,heat,and other forms of energy given off by the Sun. Solar energy can be collected and used to heat buildings and to make electricity. Most solar heating systems capture solar energy with a device called a flat-plate collector. The collector is a large plate of black metal covered with a sheet of glass.

What are solar cells used for?

Solar cells convert light energy into electricity. Solar cells are also called photovoltaic cells. Solar cells can be used to power portable devicessuch as calculators. Large numbers of solar cells are put together to create solar panels. The largest solar power plant in the world is found in the Mojave Desert,USA.

How do you use solar power?

Experiment with solar power by building your own solar-powered robot or ovenor by testing ways to speed up an existing solar car. Or analyze how solar cells or panels work. Now You're Cooking! Building a Simple Solar Oven Here is a project that uses direct solar power,gathering the sun's rays for heating/sterilizing water or cooking.
