

Can you use solar panels without battery storage?

If battery storage isn't in the cards for now, don't worry! You can still use your solar panels to power your home without battery storage. In fact, a majority of home solar systems aren't connected to battery storage. Here's how it works: Early morning and evening are times with lower solar production, but higher energy needs.

How does a solar system work without battery storage?

Without battery storage, solar systems typically do not use a battery. Solar energy is first used to directly power your home and the excess energy is pushed onto the local grid to power neighboring systems. When the solar system is underproducing, the home draws electricity from the local grid.

Is storing electricity without batteries possible?

Yes, it is possible to store electricity without the use of batteries. Many innovative energy storage technologies have been developed that use locally available, safe, and cost-effective methods. Now, let's find out the ways to store solar energy without using batteries.

Do home solar systems have battery storage?

In fact, a majority of home solar systems aren't connected to battery storage. Here's how it works: Early morning and evening are times with lower solar production, but higher energy needs. You're waking up and getting ready for the day, or making dinner and doing homework with the kids.

Can you sell solar energy if you don't charge a battery?

You can sell excess energy via the Smart Export Guarantee (SEG) -- energy generated by your solar panels that doesn't go to charging your battery or powering your home can be sold back to the grid, too. How much does a home battery storage cost?

Should you combine battery storage with solar panels?

We recommend combining battery storage with solar panels for this very reason. Getting solar panels means you can charge your battery for free whenever the sun is up. You can then rely on your battery when your solar panels can't generate enough electricity, such as on seriously cloudy days or at night.
