

Solar lights for home indoor power generation

What are indoor solar lights?

Indoor solar lights are moveable lights that use free and available solar energy. The United Nations agrees that these solar lights make for a reliable lighting source off the grid or during a power outage. Indoor solar lighting is also an excellent option for areas in the home that are not connected to the mains.

What is indoor solar lighting & how does it work?

Indoor solar lighting is also an excellent option for areas in the home that are not connected to the mains. These lights capture solar energy, convert it into electricity, and store it for use on demand. They must have four essential components: the solar photovoltaic (PV) panel, control electronics, battery, and light fixture.
