

Solar panel power generation payback time

What is the payback period for a 10-panel Solar System?

Six years is the payback period for a 10-panel system costing £4,820 with a 3.9 watts peak (kWp) and annual production of 3600 kilowatt-hours (kWh), installed in Sheffield. Here's some of the shortest payback times in the UK, for an average system size: Where to start when calculating your payback period of solar panels?

What is a solar payback period?

The solar payback period represents the amount of time it takes to recoup the cost of installing your solar system. Depending on your installer, the number of solar panels you install, and how you pay for your system, the length of your solar payback period will vary. The average solar payback period for EnergySage customers is under eight years.

How do I calculate my solar payback period?

Your electricity use and cost, the cost of solar, and your access to solar incentives all impact your solar payback period. To calculate your solar payback period, you simply divide the cost of installing your system by the amount of money you'll save each year.

How long do solar panels last on EnergySage?

That's the average payback period on EnergySage. At the end of those 7.5 years, your solar panels will have saved you enough money on your electric bill to cover the upfront cost of your system. Year eight in the example is when you technically start saving money, having finally broken even on your investment.

How long do solar panels last in the UK?

Domestic solar panel systems in the UK typically have payback periods ranging from 5 to 7 years, though, as we've already covered, this can be shorter or longer depending on multiple factors. Commercial solar installations can see payback periods as short as 1 to 3 years, sometimes even less for larger systems.

How long does it take for solar panels to pay back?

The time it takes for solar panels to be profitable (if at all) also varies by geography, as some towns simply get more sun than others. Chichester is known to be one of the sunniest locations in the UK. Here, the data shows that solar panels can pay back in just 12 years under ideal conditions (south facing, less than 20% shade, home all day).
