This is your source for discount prices on solar panels by the pallet. These panels are new, A-grade, UL certified, qualify for tax credits, rebates and come with a 25 year manufacturer's performance warranty. We design and sell renewable energy systems for projects large and small, to homeowners and do-it-yourself DIY, contractors, installers, electricians and developers.

Most solar panels installed in 2023 have a power output between 370 and 400 watts. When you install high-wattage solar panels, you need fewer solar panels to generate the electricity needed to power your home. The average home needs between 15 and 19 panels to cover its electricity usage, but it will vary from home to home!

Grid-tie solar systems use solar panels to generate electricity. Under a net metering plan with your utility company, you earn credits for the energy you produce, which you can spend to power the appliances in your home. When you need more power than what the solar panels produce, the grid supplies additional electricity.

...
