

It's solar PV with an Eddi diverter for hot water although I also have solar thermal panels installed from the previous owners. So lots of hot water and electricity. I'd be the first to admit the setup, size and orientation of the roof is ideal but still in most cases solar power is a financial no-brainer.

Solar panels cost around EUR5,000 to EUR18,000 for houses in Ireland. A grant can bring this down to EUR3,200 - EUR15,600. Here are some specific examples of what you might expect to pay (ex-grant): EUR5,700: ~2 kW of solar panels EUR10,000: ~5 kW of solar panels EUR18,000: ~9 kW of solar panels + power diverter + battery EUR1,800 extra: For blackout protection

Bought a new house 5 or 6 years ago which came with 5\*275w panels. I think to make the most of panels you need to either be able to get paid for export or have a battery to store generated power to use when you are back home.

Legal Considerations for Installing Solar Panels in Ireland. When installing solar panels in Ireland, there are

some vital legal aspects you should be aware of. For starters, you can only go so far while you're allowed to participate in the setup. You can lay the cable runs in place loosely and mount the inverter to the wall.

Solar panels perform best from 25-30 years, after all, and require very little maintenance. All you (or your lessee, if that's in your agreement) has to do is to keep the space clear and relatively free from obstructions and your solar panel farm will keep generating power, and profit, too. To recap, anyone can set up a solar farm.
