

Why did the Dominican Republic start a solar park in 2022?

On 2022, DOMINION completed the commissioning of El Soco photovoltaic solar park in the municipality of Consuelo, Dominican Republic. The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy.

Why is the Dominican Republic interested in solar energy?

The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany. The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power.

Is photovoltaic technology right for the Dominican Republic?

Here, too, photovoltaic technology is the method of choice. As the largest solar park in the Caribbean with a total capacity of 116 MW (phase I - 58 MW, phase II - 58 MW), the Montecristi solar park has laid the foundation for a sustainable turnaround in energy policy in the Dominican Republic.

How many solar panels are used in Dominican Republic?

For the construction, which has had an investment of 93M USD, a total of 147,870 solar panels were used. The project helps Dominican Republic to reach its goal until 2025, the year in which they expect 25% of the electricity consumed by the country to come from renewable energies, and has generated more than 500 direct jobs in the region.

What makes Dominican Republic a dream destination?

In the Dominican Republic and the entire Caribbean region, thoughts of white beaches and dream holidays are inevitable. The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany.

September Weather in Santo Domingo Dominican Republic. Daily high temperatures are around 89°F, rarely falling below 85°F or exceeding 92°F. Daily low temperatures are around 74°F, rarely falling below 72°F or exceeding 76°F. For reference, on August 8, the hottest day of the year, temperatures in Santo Domingo typically range from 74°F to 89°F, while on January 23, the ...

Santanasol Solar PV Park is a 65MW solar PV power project. It is located in Peravia, Dominican Republic. According to GlobalData, who tracks and profiles over 170,000 ...

Over the course of November in Dominican Republic, the length of the day is gradually decreasing from the start to the end of the month, the length of the day decreases by 21 minutes, implying an average daily

decrease of 44 seconds, ...
