What makes Vinci Energies a good company?

VINCI Energies business units draw on a robust network of experts and their extensive knowledge of industrial processes to deliver the best solutions, from renewables to energy efficiency initiatives to more eco-efficient processes. Our teams are also very active in promoting circularity - through reuse in particular - and green technology.

Who are Vinci Energies business units?

A number of VINCI Energies business units are contributing to the project, including Lefort Francheteau (heating, ventilation and smoke extraction systems), Phibor Entreprises (high-voltage work and fire safety systems) and SDEL Tertiaire (low-voltage work).

Where does Vinci Energies operate in Europe?

The deal includes operations in Germany, Switzerland, Poland, as well as seven other countries in Central and Eastern Europe. The acquisition is expected to bring VINCI Energies around EUR360 million in additional annual revenue as well as 1,600 new employees, strengthening its position in the European ICT market.

How did Vinci energy develop?

With the arrival of Faceo, historically linked to Cegelec, these activities came together under the VINCI Facilities brand, which operates in 20 countries in Europe. Year after year, VINCI Energies continued to develop - both through organic growth and by pursuing a strong external growth policy.

Thanks to the country's abundant renewable-energy sources, as well as its existing infrastructure--currently used mostly to transport fossil fuels, but which could be repurposed for green-hydrogen exports--green ...
