

South Sudan energy environment and storage

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

Why is energy infrastructure underdeveloped in South Sudan?

Partly due to the civil wars (e.g., 1955-1972, 1983-2005 & 2013-present), energy infrastructure remains very underdeveloped in South Sudan. Despite a peace agreement in 2015, which has been revitalized recently, conflict has impeded the country's effort in transitioning to renewable energy.

Is oil the right form of energy for South Sudan?

However, oil is not the right form of energy to meet South Sudan's rising energy demand due to (1) high costs (e.g. high costs of fuel and generator repair), (2) sporadic diesel fuel supply, (3) inefficiency and unsustainability and (4) detrimental health impacts on people and environment.

Is South Sudan a sustainable country?

Opportunities and policy tools While the modern energy infrastructure is almost non-existent in South Sudan, the country is endowed with rich sources of sustainable energy. Hydropower capacity alone is estimated at 5,583 MW. Major sites of hydropower are located on the Nile, including Fula, Bedden, Lekki, and Shukoli (Liu et al., 2013).

Is biomass a source of electricity in South Sudan?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. South Sudan: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How does lack of electricity affect business in South Sudan?

Specifically, over 75% of firms surveyed in South Sudan complained that lack of energy hinders business operation. Second, lack of electricity drives up costs as businesses and families try to produce their own power, which is extremely expensive.

Scatec and Kube are developing more projects in South Sudan and in other emergency zones in the region, as well as in West Africa. Previously, Scatec Solar has signed agreements with an international agency for two hybrid solar plants with a total capacity of 2.25 MW at two other locations in South Sudan.
