

Svalbard and Jan Mayen energy cutting solutions

How can Svalbard maintain a secure and sustainable supply?

Furthermore, the case found that the best long-term solution for Svalbard to maintain a secure and sustainable supply would be to integrate a mix of renewable energy technologies. Some of these technologies include: solar panels (PV), wind turbines, heat pumps connected to geothermal and both heat and electricity storage.

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

Can wind and solar power be used in Svalbard?

23) This approach is supported by an earlier case study prepared by The Nordic Council of Ministers (2018) titled 'De-carbonising Svalbard', 24) which suggests that wind and solar power used in combination with both electric boilers and heat pumps would provide ample electrical supply.

Will Svalbard be a big challenge for Russia's mining town Barentsburg?

While Norway begins to transition away from coal, a shift towards renewables on Svalbard appears to be a bigger challenge for the Russian mining town of Barentsburg. Due to the unique condition of the Svalbard Treaty, Russia's ability to remain active on Svalbard is connected to its resource extractive activities.

How has Norway diversified its activity in Svalbard?

Besides tourism, Norway has further diversified its activity on Svalbard by investing in high-level Arctic research. Norway has transformed the ex-mining town of Ny-Ålesund into an international Arctic research hub and established The University Centre in Svalbard (UNIS) in 1993.

How has Norway reinvented Svalbard's economy?

During this period, towns were built around commercial coal mining activity. Although coal mining is still present, activity is dwindling and Norway has reinvented Svalbard's economy by transitioning towards three main industries: scientific research, education and tourism. 2)

The European Environment Agency warns that the world 'urgently needs to use energy efficiently' to limit the impact of climate change. The solutions, however, are within our grasp. At B&hler, every process and product is developed with a focus on energy efficiency from the start. And efficient use of energy is not only better for the planet.
