The FTI has consistently raised concerns over high energy costs in Thailand, which are seen as detrimental to the competitiveness of manufacturers. High energy costs pose challenges for the export sector, a crucial component of the Thai economy. Speaking on the shift towards more energy-intensive operations as businesses integrate modern technologies, ...

A strong foundation for Thailand's "Energy 4.0" is already in place: approximately 10 GW of renewable energy capacity, a mature framework on energy efficiency, a supportive environment for distributed power generation, pilot programs on smart grids and digital platforms, and funding for research and development in energy storage.

Thailand's 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new technologies emerge for stationary batteries.. Somchai Homklinkaew, from the Metropolitan Electricity ...
