

Is re a solution to energy problems in the Gambia?

Policy makers across africa have been among the last to embrace Re as a solu-tion to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that Re has a real futurein the energy mix of The Gambia. They need to demonstrate this by their actions.

What is the government electrification strategy in the Gambia?

The government electrification strategy has embraced both grid-based and off-grid options. The Gambia has abundant renewable energy resources that could help meet growing demand. The Gambia has abundant solar energy resources across the country,a good biomass resource in most areas,and a modest wind regime along the coast.

Can communities benefit from renewable electricity support in the Gambia?

Communities who do not have access to the electricity network are one of the main groups with potential to bene-fit from renewable electricity support. however, community investment in the Gambia presents serious challenges. it is difficult for communities to access finance and develop the skills and knowledge required.

Are there re technology standards in the Gambia?

There are currently no Re technology standardsin The Gambia. however,the draft FiT and PPa mention general applicable codes and standards that the Re plant should comply with. it would be worth creating specific standards and codes for Re technologies to ensure adequate quality,design,safety,operation and maintenance of equipment.

Can a large-scale wind turbine be built in the Gambia?

Transportation and craning infrastructure for large-scale wind turbines beyond 35 metres is at present not availablein The Gambia. however,if the wind programme expands in future,this could be met by self-erecting turbines or by bringing in adequate cranes.

How should the Gambia support the revival of Grec?

The Gambia should therefore support the revival of GReC by entrusting the centre with a number of roles. These include scientific,technological and innovative research in Re,promoting Re for industrial uses and building the capacity of installers of Re systems with proper certi-fication.
