The case study area is located in one of the few regions in the Netherlands where traditionally self-reliance has been the norm in case of floods. However, research has shown that the construction of flood defense infrastructure may have undermined the capacity of the local communities to be self-prepared, because they feel safe behind the ...

Exawatt's detailed forecast models take account of process developments and the evolving costs of materials, equipment, consumables, energy and labour. We apply the same techno-economic principles to the analysis of other emerging technologies in the energy storage sector, including solid-state batteries, sodium-ion batteries and fuel cells.
