

How much energy does Timor-Leste consume?

Timor-Leste produced 0.29 quadrillion BTU (293,968,074,000 BTU) of energy, covering 3,412% of its annual energy consumption needs. Energy production and consumption in Timor-Leste comes from various sources: 0.003% from nuclear and renewable sources and 99.997% from non-renewable fossil fuel sources (petroleum and other liquids, natural gas, and coal).

Who is 2G Energy AG?

2G Energy AG is one of the leading international manufacturers of combined heat and power (CHP) plants for decentralized generation and supply of electricity and heat. We invite you to get a comprehensive picture of our company on the following pages.

Will Timor Gap be able to build a multi-billion-dollar gas processing plant?

Timor Gap Chief Executive Officer Antonio De Sousa noted that the ease of securing approvals for gas projects in East Timor compared with the escalating difficulties in Australia should help persuade Woodside to build the multi-billion-dollar gas processing plant in Timor.

Why should Timor-Leste invest in Greater Sunrise?

The development of Greater Sunrise has the potential to deliver value to both the people of Timor-Leste and shareholders. The Sunrise development comprises the Sunrise and Troubadour gas and condensate fields, collectively known as Greater Sunrise.

Why did Woodside Energy start a concept select program in Timor-Leste?

Last year, Woodside Energy and its partners agreed to quickly begin a concept select program for the Greater Sunrise natural gas project off Timor-Leste, after Woodside Chief Executive Meg O'Neill said the company would reassess its long-held view that piping gas from the field to the south coast of Timor-Leste was not viable.

What distinguishes 2G as a technological partner?

2G is your companion on the journey towards an economically sustainable future. Throughout the world, our innovative energy solutions reliably assist you in reaching your goals. Here at 2G, we provide a wide range of highly efficient, eco sustainable Combined Heat and Power systems.

2G Energy AG is an internationally leading manufacturer of combined heat and power system (CHP) for the decentralised provision of power and heat on the basis of gas motors driven by natural gas, biomethane, biogas, sewage gas, landfill gas or hydrogen.

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

Under the revised plan, all telcos will stop providing services to all 2G-only phones starting October 15, with the exception of M2M 2G devices, as well as Vietnamese offshore platforms and the coastal archipelagos of Truong Sa (Spratley Islands) and Hoang Sa (Paracel Islands), which can continue to use 2G services until September 2026.
