Natural gas markets have a significant effect on the economy and on the individuals who rely on the fuel for electric generation, manufacturing, heating, cooking, and other purposes. There is a physical market in which natural gas is produced, transported, stored, and consumed. There is also a financial market in which physical natural gas is

Power (electricity) trading refers to purchasing and selling power between participants in the energy markets. Various forms of power trading are possible depending on the market design, ranging from short-term trading to long-term power purchase agreements. "Market coupling" enables cross-border trading, allowing several European countries to trade on the same power ...
