I can find a lot of different power backups (UPS) online which would work with Jio fiber routers or Airtel routers but none for Jio Air Fiber (maybe since this has been launched recently). I bought an Ambrane power backup PowerVolt that has input output rating as 12V 2A DC but it didn't work with this router. Although the connections worked ...

Installing and configuring a battery backup for your wifi router is a smart move to ensure uninterrupted internet connectivity during power outages. Here are the steps to follow: Step 1: Purchase a compatible battery backup for your wifi router. Step 2: Unplug your wifi router from the power source.

The best power backup for a WiFi router is an Uninterruptible Power Supply (UPS). A UPS is a device that provides emergency power to a load when the input power source, typically mains power, fails. It also provides protection from power surges and spikes, which can damage a router. A UPS will typically provide backup power for up to several ...

If they are protected cells, you can use them directly, but you will need some sort of balancing circuit. Most routers are very tolerant of low voltage, so 3× 18650s in series will charge to above 80 % at 12 V and discharge completely at 9.9 V. Perfectly suitable for a router. It may stress the 12 V power supply when charging after a power outage.

In turn, the mini UPS, via its own 12v power cord, supplies the power along with a small internal battery as a backup. But they're very low quality, a potential fire hazard, and we simply can't recommend them when there are very high-quality products on the market at similar or slightly higher price points.
