

How TEC is powering Tuvalu with renewable resources?

TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this align well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

What should the outputs and outputs of the Tuvalu energy sector development project be?

Outcomes and outputs (including, but not limited to, technical or policy recommendations, concept design, detailed design, equipment specification) should be consistent with the safeguard policies of the World Bank and the Environmental and Social Management Framework of the Tuvalu Energy Sector Development Project.

Why did ASTAE support Tuvalu?

In FY2014, ASTAE support financed a team of experts to help the Tuvalu Electricity Corporation (TEC) ensure that the proposed World Bank Energy Sector Development Project provides a path for Tuvalu to achieve its 100 percent goal.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is the gender and energy scoping study for Tuvalu?

A draft Gender and Energy Scoping Study for Tuvalu¹¹ was undertaken in March 2014. This document provided the background and a qualitative analysis of the social, cultural, 9 Kofe, S.S. and Taomia, F.2006 'Advancing Women's Political Participation in Tuvalu': A research project commissioned by the Pacific Islands Forum Secretariat.
