

How TEC is powering Tuvalu with renewable resources?

TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this align well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby.

What is Tuvalu's energy plan?

Tuvalu has two stated goals: o To generate electricity with 100% renewable energy by 2020 o To increase energy efficiency on Funafuti by 30%. The Plan is intended for use by the Government of Tuvalu (GoT), the Tuvalu Electricity Corporation (TEC), potential donors, community representatives and other relevant stakeholders.

Should energy data be consolidated in Tuvalu?

One of the study's recommendations is the consolidation of all energy data, to build an energy balance and to include it in the annual economy report. Since Tuvalu's electricity generation efficiency is low, around 35%, the significance of the electricity sector is higher in the primary energy balance than in final end-use consumption.

What is the main source of energy in Tuvalu?

The primary energy consumption represents the upstream supply. The only national energy source is biomass (18% of total consumption). Photovoltaic and thermal solar contribute for less than 1%. The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy.

How much energy is wasted in Tuvalu?

Only 3,232 toe (71%) of primary energy supply reached an end-use category. 1,341 toe (29% of primary energy supply) was wasted, mainly due to low electricity generation efficiency. Tuvalu's electricity consumption is increasing rapidly at a 3.8% yearly average rate over the last ten years. It reached 4,121 MWh in 2004.

Why does Tuvalu use a lot of electricity?

A large proportion of Tuvalu's electricity consumption is a function of the energy efficiency of imported products. It is in the nation's economic interest to set up minimum performance levels for imported household and professional equipment: lighting, cooling, cooking, washing, television sets and other electronics equipment.
