

Twinmos voltx Heard and McDonald Islands

Where are Heard Island and McDonald Islands located?

The islands are a territory (Territory of Heard Island and McDonald Islands) of Australia administered from Hobart by the Australian Antarctic Division of the Australian Department of Climate Change, Energy, the Environment and Water.

Why is the Heard & McDonald Islands important?

It is the biggest contribution to ocean conservation anywhere on the planet this year. The Heard and McDonald Islands marine reserve will quadruple in size, an increase of almost 310,000 km² - an area larger than Italy - and will provide greater protections for an environment unlike anywhere else in the world.

How big is Heard Island & McDonald Islands?

The group's overall land area is 372 km² (144 sq mi) and it has 101.9 km (63 mi) of coastline. Discovered in the mid-19th century, the islands lie on the Kerguelen Plateau in the Indian Ocean and have been an Australian territory since 1947. Heard Island and McDonald Islands contain Australia's only two active volcanoes.

When did William McDonald discover the McDonald Islands?

His wife Fidelity Heard provided the first written description and drawings of the island. [12] [13] William McDonald aboard the Samarang discovered the nearby McDonald Islands six weeks later, on 4 January 1854. [11]

Where are the McDonald Islands located?

The much smaller and rocky McDonald Islands are located 44 kilometres (27 mi) to the west of Heard Island. They consist of McDonald Island (186 m or 610 ft high), Flat Island (55 m or 180 ft high) and Meyer Rock (170 m or 560 ft high).

What fish are in McDonald Islands?

Mackerel icefish and Patagonian toothfish are the two commercially harvested fish in the waters around Heard Island and McDonald Islands.

Heard and McDonald Islands are remote sub-Antarctic volcanic islands located in the southern Indian Ocean about half-way between Australia and South Africa, and just over 1,600 kilometres from Antarctica. The property covers a total area of 658,903 hectares of which about 37,000 hectares is terrestrial, and the remainder marine. ...

L'isola Heard e le isole McDonald sono isole disabitate che si trovano nell'Oceano Antartico, a circa due terzi di distanza tra il Madagascar e l'Antartide. Esse costituiscono un territorio esterno australiano dal 1947 e contengono i due soli vulcani attivi presenti sul territorio australiano, uno dei quali (Mawson Peak) è anche la montagna australiana più elevata, con 2.745 metri.

Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands they "open a window into the earth", thus providing the opportunity to observe ongoing geomorphic processes and glacial dynamics. ...
