

What are Gea's energy goals?

GEA actively promotes the following five energy goals: Become a Renewable Energy Partner. We want to make sure that all our allies, small and big, have all the required tools to contribute. 1. Purchase Your Stakes. Your journey to renewable energy facility ownership begins with a simple step - purchasing a stake in one of our projects.

How is energy used in Türkiye?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How did Gea start?

GEA started within a group of friends who realized that there is currently no efficient way to invest in renewable energy at a scalable level. We found that if you can't afford, for example, a solar system or an electric vehicle, it feels like you can not help in the battle of climate change right now.

Is GEA a good investment?

With GEA, an investment in green energy can be made at an affordable price while achieving financial and environmental benefits comparable to large-scale investment. There is no affordable way to make a direct impact on climate change and reap financial benefits but with GEA there is.

Türkiye's reliance on natural gas use has grown along with rising oil and gas imports, leaving the Turkish economy increasingly exposed to the volatility in oil and gas prices. There is an identified need to set a longer-term energy policy ...
