A permanently installed Generac home backup generator protects your home automatically. It runs on natural gas or liquid propane (LP) fuel, and sits outside just like a central air conditioning unit. A home backup generator delivers power directly to your home's electrical system, backing up your entire home or just the most essential items.

Without a standby home generator, costs from property damages are catastrophic. For every outage, on average, homeowners pay \$10,000 fixing frozen or burst pipes, \$21,000 in flooded basement repairs, and \$500-\$30,000 for mold removal caused by water damage. These costs, even if caused just by a single power outage, are far greater than what an average standby ...

Inverter generators utilize a different type of alternator than standard generators to generate AC power. The result is a portable generator with reduced weight and size and power that is ultra-clean and capable of safely powering sensitive electronics and tools.
