3. About home lighting system Solar home lighting system has been a boon for the people of rural areas. On the other side it has also affected the life of the people living in metro cities all around the world. This appliance is not only feasible financially but also helps the nature from getting more polluted.

it is predicted that these systems could ultimately disconnect from the grid and lead to autonomous homes or micro-grids [14]. In assessing the economic viability of solar home systems, PV-bat-tery storage systems were shown to be profitable for small residential PV systems in Germany [8], although the assumption for battery costs
