The EverGen range of high-powered solar street lights has been designed for all areas with a structure that can be adapted to optimise the capture of the available solar energy. With a power range from 40 to 150W, this range will allow you to realize all your lighting projects: paths, areas, urban roads, interurban roads.

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. The chance of wet days in Saint Barthelemy varies throughout the year. The wetter season lasts 6.9 months, from May 4 to December 1, with a greater than 13% chance of a given day being a wet day. The month with the most wet days in Saint Barthelemy is September, with an average of 6.8 days ...

Pour les clients équipés d'un compteur d'une puissance inférieure ou égale à 36 kVA, le coût de mise en place du Stockage Virtuel est de 249EUR TTC. Le coût mensuel pour la gestion de votre surplus est ensuite de 1EUR HT par mois et par kWc.

Urban Solar a donc mis en place un système de stockage virtuel. En fait, c'est très simple. Lorsque vos panneaux produisent trop d'énergie, le surplus est renvoyé vers le réseau Urban Solar. ? Alors qu'EDF rembourse ses clients pour le surplus renvoyé, Urban Solar fonctionne différemment.

Solarbird, situé au cœur de Saint-Barthélemy d'Anjou, se distingue en tant qu'acteur local dédié à l'avancement des solutions énergétiques durables. Spécialisé dans l'installation photovoltaïque certifiée RGE, notre entreprise s'engage à réduire les factures d'électricité de nos clients tout en contribuant activement à la préservation de l'environnement.
