

How much energy does Uruguay need?

The Solution to Intermittency Renewable sources--hydroelectric power, wind, biomass, and solar energy--now cover up to 98% of Uruguay's energy needs in a normal year and still over 90% in a very dry one, according to Méendez.

What is Gurn energy?

Gurin Energy combines solar and wind generation technologies with other technological products and services in innovative ways to monitor, manage and optimise the use of renewable energy for residential, commercial and industrial users.

What is the future of energy in Uruguay?

Credit: FRV Future Renewable Vision. After hydropower and wind, biomass is another important energy source, accounting for 15-20% of the electricity Uruguay produces. Wood pulp plants, for example, are now burning organic waste to produce energy for the grid, turning what was an environmental liability into an energy asset.

Should Uruguay switch to green electricity?

Uruguay, one of South America's smallest countries, is attracting outsized attention over its transition to green electricity. It didn't happen simply by building a bunch of wind and solar farms, the architect of the strategy said, but by rethinking the entire energy system. And, he said, other countries could do that too.

Who owns Gurn energy?

Gurin Energy is owned by its management team and Infratil Ltd, a listed infrastructure investment company with established renewable energy platforms in the United States, Europe and Australia and a development pipeline of over 30GW. Infratil Ltd is managed by Morrison, a global infrastructure investment company.

Does Uruguay have a wind farm?

Cover Image: Wind energy supplies up to 40% of Uruguay's power needs. This wind farm, operated by the public utility UTE, is located in the southern Uruguayan department of Maldonado. Credit: UTE
